

MUDDASANI SIRI

Computer Science Undergraduate | AI & Machine Learning

Warangal, India | +91 95158 93723 | muddasanisiri@gmail.com
linkedin.com/in/siri-muddasani | github.com/sirivarma-dev

CAREER OBJECTIVE

Computer Science undergraduate student with hands-on experience building AI-driven applications using Large Language Models, Retrieval-Augmented Generation, and multi-agent systems. Skilled in Python, LangChain, and FastAPI, with practical exposure to document intelligence, OCR, and NLP through internship and project work. Eager to apply and expand these skills by contributing to real-world AI and software development projects.

EDUCATION

B.Tech in Computer Science & Engineering (AI & ML)

Sumathi Reddy Institute of Technology for Women

CGPA: 8.15

Expected 2027

Intermediate (Class XII)

SR Junior College

91%

2022

Class X (CBSE)

Ekashila Digi School

85%

2020

TECHNICAL SKILLS

Programming Languages Python, Java (Basics), SQL (Basics), HTML/CSS (Basics)

Frameworks & Libraries LangChain, FastAPI, Pandas, NumPy

AI / Machine Learning Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Databases, Natural Language Processing (NLP), OCR Integration, Multi-Agent Systems

Areas of Interest AI Developer, Software Developer, Machine Learning Engineer

EXPERIENCE

AI Developer Intern — AutomatR

March 2026 – June 2026

- Developed and optimized AI-powered document processing solutions by working on OCR, PDF parsing, structured data extraction, FastAPI-based APIs, and knowledge-base systems, contributing to the processing of 500+ documents and multiple backend workflows.

PROJECTS

Autonomous Multi-Agent Research Assistant for Scientific Literature Analysis

- Built an AI assistant that helps search, read, and summarize scientific research papers.
- Used Large Language Models to extract and summarize the key findings from papers.
- Designed multiple agents that work together to complete the research task end to end.

SSNA — Secure Semi-Asynchronous Aggregation for Decentralized Federated Learning

- Built a federated learning project that trains a shared model across multiple devices without sharing raw data.
- Used a secure aggregation method to combine model updates from devices working at different speeds.
- Focused on keeping data private during decentralized model training.

Personal Finance Tracker

- Built an application to track and manage daily income and expenses.
- Enabled users to add, categorize, and review their spending in one place.
- Used Python to handle data, perform calculations, and generate summaries.

CERTIFICATIONS

Internship Completion Certificate (AutomatR) • Cisco: Introduction to Networks • Cisco: Introduction to Modern AI • IEEE Certification

SOFT SKILLS

Communication Skills • Team Collaboration • Problem Solving • Adaptability
